

Bee Wise — Immunize!

Immunizations for people of all ages are available at the following locations. Please call ahead to ask about fees and any other requirements.

Healthcare professionals recognize vaccines as the top medical achievement of the 20th century. Despite all the progress that's been made in this area, vaccine-preventable diseases — such as measles, mumps, pertussis, influenza and meningitis, are still around. That's why it's so important to ensure that you and your family are protected against these diseases through vaccinations.
